GODIGITAL
Digital tools for work

The problem

According to the National Institute for Statistics data (ISTAT), 17.2 % of the 20-30 old in the EU were NEETs in 2017, while inactive people have increased dramatically since the beginning of the crisis. Besides this, there is a shortage of qualified employees meeting the business's needs, as many of them lack digital skills.

The solution

The GODIGITAL will try to address the above mention issues by supporting NEETs in improving their digital skills and have increased opportunities when entering the labor market.

Description of the project

The project aims to foster the employability of young NEETs by enhancing their digital skills. To achieve this goal, partners will try to identify the existing gaps of NEET's digital skills and produce a training material aiming to cover these gaps. The training material will be incorporated

Accelerator", a smart tool that will provide learners with personalized training pathways in order to assist them in developing the skills necessary in labor market. So far, the partners have developed the training material, comprising actions that NEETs should fulfill to achieve the desired situation.

Kick off meeting

The kickoff meeting was held in Zaragoza on the 12th and 13th of November and hosted by the project coordinator, FEUZ. Partners met and discussed the project's initial activities and the most effective ways to disseminate the project and maximize its impact from the beginning.

Second Project Meeting

The second transnational project meeting was held online due to the COVID-19 pandemic on the 12th of May. Partners had fruitful discussions about the project progress and defined the next activities regarding the development of the training material and the online tool.
